ISFJ Career Trend and Potential Strength

Career Trends

There are two main groups in the occupations that are most popular with ISFJs. The large group involves jobs in office and administrative support that require careful attention to relevant details. The other group involves occupations in healthcare, where ISFJs take on a variety of roles that allow them to provide direct, practical help to others.

Potential Strength

- Ability to get things organized
- Preserve what works
- Build consensus
- People skills

Popular Occupations of ISFJ

However, there are successful people of all types in all occupations. The key to getting where one wants to go involves firstly identifying what one really wants, something that comes from a more individual place than type. Individuals with ISFJ preferences then need to use knowledge of their type to gain insight into how they might approach the different activities in planning a career. In other words, ISFJs need to build on the strengths of their type and address potential obstacles that may come along with their style as they explore options, connect with others, make decisions, and manage their careers.

Less Popular Occupations of ISFJ

Remember, every type is in virtually every career. People with ISFJ preferences are, however, less often attracted to careers and occupations in economics, marketing and sales, engineering, psychology, architecture, law and administration in such tough-minded fields as military and protective services. They are also typically found less often in careers characterized by a great deal of analytically oriented technical work or a distant analytical approach to people, work that requires ongoing attention to more theoretical and symbolic information, or careers that require continual adaptation and frequent change.
